While standing wearing regular socks, place one foot flat on the paper.</p> <ol style="list-style-type: none"> Foot length: Using the ruler, draw a line at the level of the heel and another at the level of the longest toe. Measure the exact distance between the two lines in millimeters. Foot Width: With the ruler, mark the widest point of the foot on both sides. Measure the exact distance between the two lines in millimeters. Repeat both measurements with the other foot, as the two feet are often not exactly the same length. Use the longer of the two foot lengths measured and the wider of the two widths measured.
